SuprSeal™

SEVERE LOST CIRCULATION MATERIAL

WelDril Products is reknowned among those who work in the oil patch for its commitment to providing outstanding products and services to its customers. In keeping with that commitment, WelDril has developed a superior product to handle your severe lost circulation problems.

SuprSeal™ Severe Lost Circulation Material (LCM) is an excellent product for overcoming problems with vugs, fracs and those difficult lost circulation problems. And it's manufactured right in the oil patch.

SuprSeal™ Recommended Uses:

- Severe lost circulation
- Preparation of non-cementitious slurries for restoring circulation

Other WelDril LCM Products:

Kol-Seal™
Lost Circulation / Extender Additive

Pol-E-Flake™
Lost Circulation Product

Performance Benefits:

- Complete lost circulation system - No other additives required
- Easy to use - Only add water and mix well
- Mixes well in a 4" hopper
- Makes an excellent slurry
- Reduces the need for cement "top" jobs through effective circulation of cement to surface
- Restores circulation to retain borehole stability
- Has been pumped through bit nozzles 13/32" and larger*

* **NOTE:** WelDril does not recommend pumping **SuprSeal™** through the bit nozzles..

Cost Benefits:

- Competitive pricing
- Reduces the cost of repairing "thief" zones through reducing dependency on water-hauling mud losses, cement losses, etc.

Customer Service Benefits:

- WelDril is known for providing exemplary service
- WelDril orders are readied for shipment the same day they are received
